

- 1-6 ***IMPLICATIONS OF MICROBIAL HEAVY METAL TOLERANCE IN THE ENVIRONMENT***
Anne Spain - University of Oklahoma
Communicated by: Dr. Elizabeth Alm - Central Michigan State University, Dept. Of Biology
- 7-11 ***THE ROLE OF MACROPHAGES IN APOPTOSIS: INITIATOR, REGULATOR, SCAVENGER***
ZhaoYing Pearline Teo - John Hopkins University
Communicated by: Dr. David Hughes - St. Catherine's College, Oxford University, UK
- 12-18 ***LEPTIN AS FAT ORCHESTRATOR***
Jaime Hennessey - Princeton University, Dept. of Ecology and Evolutionary Biology
Communicated by: Dr. Andrew Dobson - Princeton University - Dept. of Ecology and Evolutionary Biology
- 19-30 ***MOLECULAR DYNAMICS AS A BRIDGE: FUNDAMENTALS, METHODS, AND CURRENT RESEARCH***
Kaden Hazzard - Ohio State University
Communicated by: Dr. John Wilkins - Ohio State University, Dept. of Physics

About the Cover:

A ribbon rendering of the human leptin receptor protein provides a three-dimensional view of the molecular target of leptin, an important hormonal regulator of lipid metabolism. Inside, the role of leptin as a somatic regulator of the body's energy resources in states of stress is reviewed by Jaime Hennessey.

About RUR:

Reviews in Undergraduate Research is an international undergraduate research publication put together by the students of Rice University in Houston, TX. RUR aims to provide an international forum where undergraduate students can share knowledge of current natural sciences research with their peers around the world.
